

Question 7: A teacher is complaining that most of his students live too far from the school... He asked all the Year-10 students at Nowhere Hill school were asked "how far do you travel to school". The results are shown in the histogram below:

By first scaling the x- and y-axes, complete the frequencies in the table below:

distance (km)	0-2	2-4	4-6	6-10	10-20	20+
frequency	56	...	0

And work out what proportion of these Year-10 students live more than 2 km from school?
